# Student Management System

Presented by Team3

Contents

Introduction

- In today's educational landscape, managing student operations efficiently and effectively is essential for providing quality education and ensuring the smooth functioning of educational institutions. A Student Management System (SMS) is a comprehensive software solution designed to streamline administrative tasks, enhance communication, and improve overall school management.

Features

Login

Users can login by using default account and update password.

Admin

CRUD Operations

Student

CRUD operations (in processing)

Class

CRUD Operations

Features

Subject
CRUD Opertations

Assign Subject
CRUD Operations (Relations between Class and Subject)

Change Password
Update Password

Logout
To logout from account

Databases

Tables

Class	Subject
class_subject (Relations between class and subject)	users

Conclusions

In conclusion, a Student Management System is an indispensable tool for modern educational institutions seeking to enhance efficiency, productivity, and communication while providing a superior learning experience for students. By leveraging advanced technologies and intuitive user interfaces, an SMS empowers administrators, teachers, and staff to streamline operations, foster collaboration, and achieve academic excellence.
